"Austin is truly one of the most talented people I know. From my first interaction with him I have been highly impressed by his professionalism, technique, and out right passion for technology. Austin is one of those people who belongs in technology. Some people strive to be the best in their field and for Austin it comes naturally. When Austin relocated to Texas, Utah lost one of the best Designers in the state. I would highly recommend Austin for anything from an individual contributor role to managing a design team. He is exceptional in everything from user experience, front end design, to client interaction. We were lucky to have him as long as we did and you would be too. Austin is an all star. He is highly proficient in working with the latest and greatest technologies including HTML5, CSS3, Angular.js, API Integration, and much more. Feel free to reach out to me if you are looking for additional information."

"Austin Condiff is the most creative, principled and innovative designer I have had the privilege of working with and getting to know. Austin has 'insane' creative and artistic design abilities. His natural and self-taught abilities excel those with degrees and experience already working in the field. Austin displays maturity, teachability and undaunted dedication to completing/exceeding project expectations. He has a courageous optimism to venture into unfamiliar territory and still deliver cutting-edge work."
